

## Update to 'ClaimCheck' Product Editing

---

McKesson's 'ClaimCheck' product is routinely updated by the McKesson Corporation based on changes made to the resources used, such as Current Procedural Terminology (CPT) and Healthcare Common Procedure Coding System (HCPCS) coding guidelines, the Centers for Medicare & Medicaid Services (CMS) Physician Fee Schedule Database, CMS National Correct Coding Initiative (NCCI) and/or provider specialty society updates. The 'ClaimCheck' product's procedure code edits are guided by these widely accepted industry standards.

These edit changes went into effect for claims processed beginning with the remittance advice of March 1, 2016. Providers may notice some differences in claims editing; however, most claims will continue to edit in the same manner, but when applicable, claims may now pay or deny for a different reason.

For questions related to this information as it pertains to Legacy Medicaid claims processing, please contact Molina Medicaid Solutions Provider Services at (800) 473-2783 or (225) 924-5040. For questions regarding Bayou Health updates, please contact the appropriate health plan directly.
